SENAB

Färgmarkeringar och/eller symboler för hållbara alternativ i prislistan:

Mörkgrön markering eller symbol

Miljömärkt produkt – Möbler där hela den sammansatta varan har en typ 1 miljömärkning enligt ISO 14024 med Svanen, Möbelfakta, EU Ecolabel eller annan likvärdig märkning.

Ljusgrön markering eller symbol

Hållbarhetsmärkt produkt eller beståndsdel – Möbler där hela eller delar av den sammansatta varan är hållbarhetsmärkt, exempelvis med FSC, EU Ecolabel eller OEKO- TEX®. Leverantören ska kunna ge mer detaljerad information om vilka delar eller variationer som är hållbarhetsmäkta vid begäran.

Orange markering eller symbol

Klimatberäknad produkt – Produkt med dokumenterad miljövarudeklaration (EPD) enligt ISO 14025.

Lila markering eller symbol

Produkt med återvunnet eller förnybart material (enligt definitionerna i ISO 14021). Leverantören ska kunna ge information om andel (%) återvunnet och/eller förnybart (biobaserat) vid begäran. Märkning av återvinningsbart material utgår.

Blå markering eller symbol

Demonterbar produkt – Produkt som är demonterbar till olika komponenter och beståndsdelar som i första hand möjliggör återbruk och i andra hand materialåtervinning när produkten nått sin fulla livslängd. Produkten ska vara designad för renovering, det vill säga att det ska vara enkelt att reparera och byta ut moduler, komponenter och beståndsdelar som slits över tid. Exempelvis ska ytskikt, som bordsskivor, textil och stoppning kunna tas isär, avlägsnas och ersättas med hjälp av vanligt förekommande manuella verktyg, ej specialverktyg. Enklare reparationer och utbytesarbeten ska kunna utföras av en lekman. Om det krävs fackmanakunskap för mer avancerade arbeten ska det framgå av anvisningarna som leverantören ska kunna ge vid begäran. Anvisningarna ska innehålla en sprängskiss, steg för steg beskrivning inklusive vilka verktyg som krävs samt hur möbelns ingående delar bör källsorteras.

CERTIFICATIONS AND MATERIALS USED

QUALITY CERTIFICATIONS

CERTIFICATION ISO

In October 2004, Magis was granted the Quality Certification of the Swiss certification bureau SQS (an IQNet partner) for its management system.

The certification by an accredited external bureau allows Magis to implement a quality management system that meets the international standards of UNI EN ISO 9001:2000.

In December 2007, Magis was granted the ISO 14001:2004 Environmental Certification of the Swiss certification bureau SQS for its environmental management system.

CERTIFICATION GREENGUARD

Magis, which has always been sensitive to environmental themes, has obtained the Greenguard Certification, a program promoted and directed by UL Environment undergoing products to severe tests against chemical emissions in indoor spaces.

The Greenguard certified products distinguish themselves therefore by low emission levels in the air and by a minimum level of chemical emissions in indoor spaces. Magis received the Greenguard Gold Certification, which offers even stricter certification criteria and considers safety factors to account for sensitive individuals (such as children and the elderly), ensuring in this way that a certified product is acceptable for use in environments such as schools and hospitals.

Magis obtained the Greenguard Gold Certification for the following products:

Air-chair / Air armchair
Air table
Baguette
Bell chair
Chair_One / Chair_One 4 star / Chair_One Public Seating System 2 / Chair_One cushion / Stool_one / Table_one bistrot
Costume
Cyborg club / Cyborg stick

Traffic armchair / Traffic sofa / Traffic bench / Traffic platform / Traffic chaiselongue / Traffic low table
Tibu
Trioli
Troy / Troy front cover / Troy fully covered / Troy stool
XZ3

CERTIFICATION FSC

Magis also got, in 2014, the FSC® C123236 certification, which guarantees that wooden components have been sourced from responsibly managed woodland, thus protecting precious natural resources and biodiversity.

MAGIS'S MATERIALS AND THEIR MAINTENANCE

METALS

Magis uses the following metals in the manufacturing of its products: steel and aluminum tubing, steel plate, steel and stainless steel rod, aluminum sheeting, extruded aluminum profiles and die-cast aluminum. Surface treatments used:
On steel: chromium plating, cold galvanising, hot galvanising, epoxy coating, cataphoresis coating with polyester.
On aluminum sheeting, aluminum tubing and extruded aluminum profiles: natural and black anodising.
On die-cast aluminum: polishing, epoxy coating, titanisation coating with polyester.
Only products bearing the inscription "Suitable for Outdoor Use" should be used outside.
Products not specifically marked with the words "Suitable for Outdoor Use" must not be used outside because they would be subject to permanent damage by the elements.
We advise you to consult us before using outdoor products in extreme weather conditions.

CLEANING OF METALS

We recommend using a soft rag, either dry or wet. When needed, use ph-balanced soap diluted in water. Do not use abrasive sponges as they may leave scratches. Immediately dry after washing with a soft rag or chamois leather. Never leave water or other liquids to sit on metal parts. Avoid contact with all acidic substances. Periodic maintenance and cleaning allows the products to keep their original look and lengthens the duration of their performance.
For the Al Bombo stool (in die-cast aluminum) we recommend using the special Al Bombo Cleaning Kit.
As die-cast aluminium is not treated with any chemical products or any kind of painting, small marks or irregularities, which might be visible on the surface, should not be considered as faults, but on the contrary as technical results of the nature of aluminium itself. Aluminium is very likely to dull while using. Regular care is therefore necessary to maintain its original appearance. We recommend using specifi c cleaning products for aluminium.

PLASTICS

The plastic materials used by Magis are numerous. Their choice depends on the desired visual effect and particular durability requirements. In addition, certain additives can be used to guarantee that the plastics pass the most stringent safety tests.
All Magis's plastics are organic and fully recyclable. Their life cycles are long, which is an advantage for the environment.
At the end of their life-cycle, we recommend taking the products or parts of the products to specialised recycling centres.
All products and product parts are coloured throughout and not painted, with the exception of the metallic silver version of the Bombo stool.
The plastics most used in Magis' production are polypropylene (PP) and ABS.

CLEANING OF PLASTICS

We recommend using a soft rag, either dry or wet. When needed, use ph-balanced soap diluted in water. Do not use abrasive sponges as they may leave scratches. Avoid using acidic products, solvents and products containing ammonia.
Plastic products marked with the label "Suitable for Outdoor Use" can be used outside. However, prolonged exposure to sunlight may cause the fading of colours. This is due to the fact that there are currently no additives available on the market that protect plastics from colour fading.
Periodic maintenance and cleaning allows the products to keep their original look and lengthens the duration of their performance.

WOOD

Because wood is a natural material, there are small differences between the products. These are not to be considered faults, but a characteristic of a natural material.

CLEANING OF WOOD

We recommend using a soft rag, either dry or wet. If desired, use ph-balanced liquid soap especially formulated for wood, diluted in water. Do not use abrasive sponges, as they may leave scratches. Avoid using acidic products, solvents and products containing ammonia. Avoid exposure to sunlight as this may permanently discolour the surface. Periodic maintenance and cleaning allows the products to keep their original look and lengthens the duration of their performance.

Magis has in recent years significantly expanded its custom-made production to respond to the increasing, and increasingly diverse, requests of the contract market. Today, Magis is in a position to satisfy the following requirements:

COLOURS OF PLASTICS

• We can customise the colours of our injection-moulded products for quantities of no fewer than 300 pieces per colour.
• We can customise the colours of our rotational-moulded products. The quantities must be of at least 30 pieces per colour for large pieces (e.g. Voido, Spun or Raviolo) or at least 50 pieces of smaller products.

PAINTING

• We can customise the colours of metals and woods for quantities of no fewer than 30 pieces per colour.

FABRIC OR LEATHER UPHOLSTERY (COM/COL)

Kindly refer to the COM/COL section from p.360 for more information about the number of meters of fabric/leather to be sent to Magis to upholster the product:
• If the client chooses a fabric/leather from our assortment.
• If the fabric/leather is supplied by our client – and is therefore not in our assortment.

TABLES

• Magis is happy to consider making tables of sizes and with finishes that differ from our standard products.

Please do not hesitate to contact Magis sales department for any further information or cost estimates you may be interested in.

INSTRUCTIONS

INSTRUCTIONS FOR SIMPLIFIED READING OF THE PRICE LIST

Each product is listed with the description of its materials, article reference, colours and finishes.
The finishes for steel, aluminium, plywood and HPL laminate, as well as the plastic colours, are followed by a number.
The same number represents finishes and colours and is intended to act as a guide as to the actual finish and colour.

For the chairs and some of the tables, actual colour samples are also available.

The colour number is followed by one of the following abbreviations:
C = which stands for matt or glossy colours
TL = which stands for translucent colours
TR = which stands for transparent colours

To order correctly, please specify the article reference plus the code of the colour/finish.
Example:
SD74 Air-Chair green 1320 C
SD1722 Cyborg Lord glossy white 1736 C / Kvadrat Divina MD 613 / pink

MATERIALS, FABRICS AND LEATHER

The printing ink and the screen visualization cannot exactly reproduce the colours. For higher accuracy we suggest inspecting the colour samples.

LEGEND OF PICTOGRAMS

	number of units package
	number of boxes package
0000.000.00	custom code goods
m^3	volume
Kg	gross weight
Kg	net weight
	shows that the product is suitable for outdoor use with regular care and maintenance
	shows that the product is suitable for covered outdoor area
	shows that the product is suitable for outdoor but not for saline environment
	shows that the chair/stool/small table is stackable and specifies the maximum number of stacked units
	shows that the product needs to be assembled
	indicates the possibility for the customer to supply his/her own material (leather or fabric)
	indicates that the product has a removable cover
	shows that the product is fireproof
	Important note

This information is generally also featured in the written product descriptions.
All prices (unless otherwise specifed) apply to each individual unit.
Unless otherwise specified, product dimensions are shown in centimeters.

⚠ As natural aluminium is a living material, it is very likely to dull while using.
Regular care is therefore necessary to maintain its brilliance.
Small marks or irregularities, which might be visible on the surface, should not be considered as faults, but on the contrary as technical results of the nature of natural aluminium and its brushing and polishing by hand.

Costume

Design Stefan Diez, 2021

Modular sofa with a 4 mm thin structure made from recycled and recyclable polyethylene.
Cover in fabric available in 3 categories. The cover is fully removable thanks to the elastic loops hooked into the bottom.
The sofa can be easily dressed and undressed for washing and replacement.
The modular system consists of one single unit, which can be interlocked in various constellations or extended with armrests.
All parts are separately replaceable.

black 5303	black 8515		
brick red 5304	brick red 8516		

⚠ Small misalignments or height differences between the tabletop and the extensions, which may be noticeable after assembly, **should not be considered defects**. Instead, they are normal consequences of the structure and tabletop manufacturing process, the characteristics of the extension mechanism, and potential irregularities in the flooring. Such differences can be easily corrected by adjusting the attachment points of the tabletop or the support points of the extensions, thereby realigning the various elements with one another.
